Your attitude towards investment risk

Why you need to understand risk

There are a number of ways at looking at risk.

The Cambridge dictionary defines risk with elegant simplicity as 'the possibility of something bad happening.' Many investors define it by asking the question: "What are the chances of loosing my money?" Neither of these two definitions is exactly correct in an investment sense. However they may define your attitude toward risk – and that is just as important.

An Australian investment website, Moneymanager (<http://moneymanager.smh.com.au>), defines risk as 'the variability of returns.' This definition is closer to that used by investment professionals. Professional investors see risk as the difference between expectations and results.

Risk can be the price you pay for returns. Just as the more work you do the more you should be paid, so the more risk you take, the higher return you should receive. This is the 'risk/return trade-off'. It is one of the key concepts on investment.

Any investment decision implies some risk. With a better understanding, you can make a more informed investment decision – accepting some risks and rejecting others. In other words – you can manage risk.

- Invest the majority in real estate
- Invest the majority in shares
- A mix of two or more of the above
- Spend it all

5.2 Suppose that two years ago you purchased shares in a company that was recommended to you by experts due to the future business prospects of that company. After a two year period of the share market in a downward trend (a bear market) the shares of the company were trading at a lower price than what you paid for them. You subsequently receive expert advice that confirms that even though the share price is lower due to the share market conditions over the last two years, the future prospects of the company are even stronger than previously advised. Given that your shares in this company are already trading at a loss, would you buy more shares in this company based on the latest expert advice?

- Definitely not
- Probably not
- Not sure
- Probably
- Definitely

5.3 A retirement income stream provides regular income usually in the form of a pension payment and is generally purchased using your savings and superannuation benefits. Retirement income streams come in many forms and vary as to the level of flexibility and control that a person has over the income stream, the underlying investment and whether or not your beneficiaries will receive the remaining value of your investment in the event of your death. Assume you invested your life savings into a retirement income stream, what are the features that would be the most important to you?

- Ability to access your capital at any time and retain control over the investment strategy, however the income stream would not be guaranteed for life
- Receiving a lower less flexible income stream that is guaranteed to last the life-time of you and your partner with no residual value paid to your estate in the event of your deaths
- Do not have a preference

5.4 Investment gearing is the process of borrowing money to invest, although gearing can increase the potential return significantly and often provide taxation benefits; it also significantly increases the level of risk. Suppose a financial adviser recommended that you borrow money to invest in a portfolio of managed funds and shares, which of the following would best describe your reaction?

- I would see this as an opportunity to significantly increase my wealth and would not be concerned about the increased risk
- I would consider the opportunity but would feel uneasy about the increased risk
- I would never agree to borrow money to invest as I consider the risk too high

5.5 One of the major aspects of financial planning is to organise your financial affairs to minimise the impact of taxation and maximise any available Government benefits such as the age pension or similar benefit. After organising your financial affairs in this way, a change in legislation could leave you in a worse position or no better off. In consideration of this issue would you organise your affairs in this way in order to qualify for a Government benefit or to minimise taxation, and bear the risk that the legislation may change?

- I would not take a risk if there were any chance that legislation could change and leave me in a worse position.
- I would take a risk if there was a relatively low chance that the legislation could change leaving me in a worse position
- I would only take a risk if there was at least a 50% chance or greater that I would be in a better position.

5.6 Suppose that you have set an objective to retire at a particular age and have also determined the life style you require in retirement. Your financial adviser has advised you that in order to achieve the life style you require in retirement at the specified age, you will need to make investments of a higher risk than you would normally feel comfortable with. Which of the following options would you feel most comfortable with?

- I would rather take a higher risk investment than alter my retirement objectives
- I would rather take a combination of higher risk investment as well as altering my retirement objectives
- I would rather alter my retirement objectives than take any more risk

Option to Quote Tax File Number

Most investment and superannuation application forms request the applicant to provide their Tax File Number (TFN).

As you will be receiving ongoing service from **Apogee FP** we offer you the option of authorising **Apogee FP** to hold your TFN, and/or details of your exemption status, in our records.

The collection, use and disclosure of TFNs are strictly controlled by taxation and superannuation laws and the Privacy Act. As an authorised representative of **Apogee FP**, Michael Milne is authorised to collect TFNs under the Income Tax Assessment Act 1997.

You are not required to provide us with your TFN and it is not an offence if you choose not to do so.

If you do not provide us with your TFN and you wish to quote your TFN on investment and/or superannuation application forms, you will need to bring your TFN with you when calling into our office to complete these documents.

Important Information

Investment Bodies

Investment bodies are authorised to collect TFNs under the Income Tax Assessment Act 1997. It is not an offence if you choose not to provide your TFN to an investment body. However, if you do not quote your TFN, or exemption status, tax will be deducted from your income distributions at the highest marginal rate.

Some persons/entities are exempted from the TFN quotation arrangements, if the exemption status is notified to the investment body:

<ul style="list-style-type: none">Non-residents	<i>state country of residence.</i>

Superannuation Bodies and Approved Deposit Funds

Superannuation Bodies and Approved Deposit Funds are authorised to collect TFNs under the Superannuation Industry (Supervision) Act 1993. It is not an offence if you choose not to provide your TFN, however, if you do not provide your TFN:

- you may pay more tax on your superannuation benefit than you have to (you will get a refund at the end of the financial year in your income tax assessment);
- your fund is generally required to reject your non-concessional (after tax) contributions;
- your concessional (pre-tax including employer) contributions may be taxed at 46.5%; and
- it may be more difficult to find your superannuation benefits if you change address without notifying your fund, or to amalgamate any multiple superannuation accounts.

Please tick **ONE** of the boxes below to indicate your choice of the options available. If you tick boxes 2 or 3, please record your TFN, and/or exemption status, at the bottom of this page.
